Forecast for Saturday 08 May 2021

Weather: Dry with thickening cloud through the early hours. A dry, bright start before a band of rain (snow above 600m initially, rising to 800m) pushes northward, reaching Arran by mid morning and Lochaber by late morning, gradually clearing northwards by evening. Blizzard conditions expected above munro level with occasionally heavy rain affecting lower slopes, mainly in the east.

Chance of cloud free mountain/hill tops above 800m: 60% falling almost zero by early afternoon.

Visibility: Areas of cloud above 600m expected across The Trossachs, otherwise no issues until cloud sets in more widely by late morning, this fallling to 300-500m. Whiteout conditions likely on highest slopes during snow and widely hazy on lower ground in rain, especially in east.

Met Office Aberdeen Meteorologist's View
Be aware of fast deteriorating conditions from the south through morning.

Forecast for Sunday 09 May 2021
Weather: Changeable conditions through the day as scattered showers develop widely but there will also be some sunshine, especially through morning. Afternoon showers are likely to be on the heavy side with a risk of thunder.

Maximum wind: Southeast 15-20 gusting 35mph.

Chance of cloud free mountain/hill tops above 800m: 50%.

Visibility: Areas of cloud above 400m through morning will thicken for a time through midday before lifting and breaking. Some patches of cloud will accompany showers down to around 500m.

Temperature: **Glens:** 4-6C rising 11-13C.
At 800m: 2C rising 6C.
Freezing level: 1200m rising well above all summits.
